

Flexcon's *Plastic Pallets*

Save you money!

Features

- Injection-Molded from High Density Polyethylene (HDPE)
- Many sizes are USDA & FDA approved
- Lightweight, lowering your overall shipping costs
- Ergonomic handles improve handling, reduce injury potential
- Four-way entry: improves efficiency in handling by forklift or pallet jack
- Flame-retardant (FR): FR plastic options available
- Plastic pallets are as durable as wood and weigh less
- Strong, easy to handle & maintenance free
- Safe, sanitary & can be sterilized
- Impervious to most chemicals, aggressive liquids and gasses

Benefits to using plastic instead of wood

- Plastic pallets can be exported to many countries where wood skids are not accepted.
- Plastic pallets help save trees and are the "GREEN" alternative
- Wood can be increasingly more expensive due to scarcity of lumber and the need for forest conservation
- Plastic is 100% recyclable
- Wood can be easily damaged – protruding nails, splintered wood can cause worker injury
- Plastic pallets are maintenance free, safe, and have no rough edges; eliminating danger to workers and products
- Wood has been proven to be unsanitary by the FDA due to bacteria-bearing characteristics
- Plastic pallets can be completely sanitized and are inexpensive to clean – washable with water or steam
- Inert to infestation, mold and mildew
