RemStore® Dividable Totes
Flexcon’s perfect solution for maximizing storage density in your Kardex equipment

RemStore totes (patent pending) are specially designed to optimize space within VLMs and carousels. This custom design provides 15% additional capacity in comparison to other totes used in automated storage and retrieval systems.

Designed to maximize space utilization

Implements ergonomics by presenting contents at a convenient angle

Increases accuracy with easy to read labels for each compartment

Enhances productivity by pulling out quickly while the Catch-Hook™ positions the tote for easy return

Features
- Totes stack easily with or without dividers inserted
- Custom handle for easy and comfortable tote access
- Catch-Hook™ design for easier and faster part storage or retrieval
- Dividers create a tight seal between compartments eliminating part migration
- Drift-Lock™ design automatically helps position totes properly for safe and productive operations
- Unique design allows for 99% space utilization creating more room for product

Options
- Snap-in dividers to create custom compartments for specific parts
- Standard color blue, also available in custom colors
- Label every compartment at 30° angle for easy operator reading and identification
- Customize totes with your company logo
Store up to **15% more** using RemStore totes

**Perfect Fit**
Unlike other containers, RemStore totes are designed to fit perfectly in VLMs and carousels.

**Depth Maximization**
Space saving (patent pending) design helps reclaim otherwise wasted space.

**Improve operator performance**

**Catch-Hook™**
The Catch-Hook allows for quick and easy operator access.

**Drift-Lock™**
Drift-Lock design increases safety and productivity levels

**For use in:**
- Vertical Carousel
- Horizontal Carousel
- Shuttle VLM
